

KAYMAN SRINIVASAN ARUMUGAM

Kuala Lumpur, Malaysia | +60 1155826462 | kaymansrinivasan17@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science (AI) student with hands-on experience in end-to-end data pipelines, data quality validation, operational dashboards, and ML model workflows. Skilled in Python, SQL, and Power BI, with exposure to AWS cloud platforms and structured project tracking via GitHub. Experienced in translating analytical findings into clear documentation and stakeholder reports. Eager to contribute to data science operations, annotation workflow coordination, and quality management.

EDUCATION

Multimedia University (MMU), Melaka, Malaysia

Oct 2023 – Oct 2026

Bachelor of Computer Science (Hons) — Artificial Intelligence

Relevant Coursework: Machine Learning, NLP, Data Analysis, Cloud Computing (AWS), Software Engineering

IIT Indore, India — Foundation Certification in AI & Data Science (Distance)

Nov 2025 – Jun 2026

Intensive program by Intellipaat: Python, Statistics, Data Visualization, Machine Learning, SQL, Generative AI

TECHNICAL SKILLS

Data & ML: *Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Keras, Tensor Flow), SQL, Statistical Analysis, EDA*

Dashboards & Reporting: *Power BI, IBM Cognos Analytics, Excel (Pivot Tables, VBA, VLOOKUP)*

ML & Annotation Concepts: *Model training & evaluation, NLP pipelines, data labeling, quality sampling, class Imbalance handling*

Cloud & DevOps: *AWS (EC2, S3, RDS, IAM), Git, GitHub Issues (task & issue tracking), API*

Documentation: *Structured SOPs, project READMEs, workflow guides, stakeholder reporting*

EXPERIENCE

Project Intern – UST Global, Penang, Malaysia (Incoming)

Jul 2026 – Oct 2026

- Selected as Project Intern out of a highly competitive candidate pool for a 3-month technical training program at UST Malaysia's strategic digital delivery hub.
- Slated to collaborate with regional teams on enterprise-level IT and software solutions.
- Prepared to apply academic knowledge to real-world deployment pipelines and agile workflows.

Data & Operations Consultant — Aswath Asserts EST, India

Oct 2025

- Built bilingual (EN/BM) real estate chatbot using Meta API + Railway+ Gemini API; automated lead qualification and Schedule booking Chatbot — reduced manual response time from 4 hours to under 2 minutes.
- Maintained operational documentation and process notes to ensure consistent execution across the reporting cycle.

PROJECTS

Airline Sentiment Analysis — NLP Pipeline (Competition)

2025

- Built and evaluated an end-to-end NLP annotation and classification pipeline, comparing TF-IDF with BERT models (75% → 82% accuracy).
- Performed systematic data quality analysis: class imbalance assessment, label consistency checks, and neutral sentiment ambiguity review.
- Documented model limitations, sampling findings, and improvement recommendations in a structured competition report.
- Secured 3rd Place among 60+ competing countries at the UM Data Science Digital Race 2025.

Student Employability Analysis — Large-Scale EDA & Reporting

2026

- Processed and validated 100,000+ student records end-to-end: data cleaning, anomaly flagging, feature engineering, and quality checks.
- Engineered composite KPI metrics and produced structured analytical reports highlighting trends, bottlenecks, and placement drivers.
- Prepared stakeholder-ready summary dashboards with variance analysis and risk indicators, mirroring operational reporting workflows.

Steel Industry Energy Consumption — Time Series & Ops Monitoring

2024

- Monitored and analyzed 2-year time series data from DAEWOO Steel; flagged anomalies, identified consumption pattern shifts and reduced 20% of energy consumption.
- Applied ARIMA/SARIMA models to forecast operational load; produced structured reports with risk flags for non-technical stakeholders.
